

Headset Requirements - AMA Live Online Seminars

AMA strongly recommends that for Live Online Seminars, participants use a headset with the following characteristics:

- USB connection, with plug-and-play capability (i.e., with the software driver included)
- A built in microphone with noise-cancelling capabilities
- Clear digital stereo headphone audio

An example of a headset which has been found to work well with AMA Live Online programs is the [Logitech h340](#). Headsets with labels indicating "designed for videoconferencing" or "designed for Skype" should also work well.

Internet Browser and other technical requirements are available by clicking [here](#).
